

# Bath and North East Somerset's Parks Service

***'Connecting people to green  
space throughout B&NES'***

**Paul Pearce**  
Parks Projects  
Manager

## **Recommendations from the research**

- **Deliver a mixture of doorstep and destination provision**
- **Design and deliver greenspaces which are multifunctional**
- **Develop an action plan for improving quality across the area**
- **Address quantity shortages in key typologies – allotments, youth provision, parks and recreation grounds, improving access to the Public Rights Of Way network**
- **Help to create and enhance a network of both utility and recreation routes for use by foot and bike in both urban and rural areas**
- **Use neighbourhood plans to identify locations for new provision**

## **Aims of Green Spaces Strategy:**

### **Our green spaces will:**

- Deliver spaces which help support fit and healthy communities
- **Encourage communities to explore their green infrastructure through a connected green grid**
- **Support communities to connect with their green spaces**
- Enhance the unique and beautiful landscape of the district
- **Reveal and celebrate the unique local heritage**
- Help mitigate the impacts of climate change and pollution
- Showcase excellence

***‘Connecting people to green space  
throughout B&NES’***

## **Key opportunities**

### **1. Sharing information about what’s in our green spaces**

- **Helping people find the facilities that they need (wedding venues, park’s café, tennis courts, play areas)**
- **Revealing and celebrating what’s in our parks**
- **‘And if you liked....Victoria Park’s Victorian planting you might also like Sydney Gardens Georgian landscape’**

### **2.Helping people to get around the district on foot and by bicycle using our green spaces**
